

BRAKUR CUSTOM CABINETRY, INC.  
LIMITED WARRANTY

Brakur Custom Cabinetry, Inc. offers a limited warranty on cabinets and countertops against defects in materials and workmanship for a period of one (1) year from **date of delivery**.

WHAT IS COVERED:

Initial repair, replacement (if necessary—Brakur’s discretion), touch up and adjustments to cabinet doors, drawers and countertops.

WHAT IS NOT COVERED:

- 1) Cabinetry and countertop damage after delivery, particularly from NON-BRAKUR installation, or damage by other sub-contractors on site
- 2) Normal wear and tear
- 3) Cabinet door and drawer adjustments beyond initial service.

Countertops are to be carefully inspected upon delivery and prior to installation. Warranty work must be allowed for prior to installation. Repairs to damaged tops after installation will be charged based on time and materials.

**\*\*PLEASE NOTE: SPECIAL WARNING LABELS** regarding thorough inspection are adhered to all Brakur tops prior to leaving our factory. It is up to the installers to read these labels and adhere to the policy.

All cabinet doors are adjustable. Weather conditions and temperatures may cause natural expansion and contraction in the wood, thus doors may need to be adjusted. This is considered normal maintenance and is not covered under warranty service. (See web page on adjusting hinges)

Normal everyday use may also require doors to be adjusted periodically. This is also considered normal maintenance and is not covered under warranty service.

Expansion and contraction of wood is a natural phenomenon. It is a cyclical process, meaning that what expands will eventually contract and vice versa. Temperature and humidity variations drive this natural process. Therefore, effects of these phenomena are not covered by this limited warranty.

In some cases, doors, drawers and shelving that require service may have to be brought into Brakur’s factory showroom by the customer for repair.

BRAKUR CUSTOM CABINETRY, INC. RESERVES THE RIGHT TO CHANGE  
COMPONENT MANUFACTURERS BASED ON AVAILABILITY, QUALITY AND  
VALUE.
